

# Philosophy for Children (P4C) at Norbury

Philosophy for Children (P4C) is an approach to learning and teaching which helps to improve children's thinking and communication skills, boosts self esteem, and can help to improve academic attainment.

In P4C a stimulus such as a video, image or story is used to encourage the students to come up with a philosophical question to discuss in class. Over time, the students are supported to think more deeply and philosophically by encouraging critical, creative, collaborative and caring thinking.

## Year 7 Philosophy for Children (P4C)

In P4C (year 7) we explore the following areas:

**UNIT 1: Thunks (Thinking questions)**

**UNIT 2: Friendships and Families**

**UNIT 3: Bullying**

**UNIT 4: Rules and Consequences**

**UNIT 5: Racism and Discrimination**
